Research, Teaching and Actions in Higher Education on the UN Sustainable Development Goals María Alcantud Díaz, 2021-10-22 The UN is currently focused on monitoring and improving learning outcomes and people who are generally excluded from education. Indeed, in its Agenda 2030, higher education forms an important part of the UN's Sustainable Development Goals (SDGs) related to poverty, hunger, health, education and gender equality. This volume brings together contributions that provide research and teaching experiences, as well as reflections on actions taken in higher education institutes, associated with these SDGs.

Mathematics Teacher Education in the Andean Region and Paraguay Yuriko Yamamoto Baldin, Uldarico Malaspina, 2018-10-04 This Open Access book is an excellent synthesis of the initial and continuing preparation for Mathematics Teaching in Bolivia, Ecuador, Paraguay and Peru, from which comparative analyses can be made that show similarities and differences, and highlight various perspectives. In February 2016, the 5th Capacity and Networking Project (CANP) workshop of the International Commission on Mathematical Instruction (ICMI) was held in Lima, Peru. The coordination of this two-week workshop was undertaken by an international scientific committee (IPC), with equal participation by mathematicians and mathematics educators from the region and from the international ICMI and IMU community. The goal of CANP5 was to improve the quality of mathematics education in the region, which led to the main theme of the scientific program "Initial and Continued Teacher Education". Country Reports on the main theme of teacher education systems for each country in this region were presented and discussed to detect common issues that might be improved through a collaborative network. One of the most important results of this event was the creation of a Mathematics Education Network, namely the Comunidad de Educación Matemática de America del Sur - CEMAS. This book brings to the international Educational Community an important collection of experiences and ideas in the Mathematics Education of four Latin-American countries in the developing Andean region and Paraguay. The dissemination of these results can promote the search for international collaborative actions in a wider scale.

Beyond Methods B. Kumaravadivelu, 2003 In this work, B. Kumaravadivelu presents a macrostrategic framework designed to help both beginning and experienced language teachers develop a systematic, coherent and personal theory of practice. His book offers to provide the tools a teacher needs in order to self-observe, self-analyze, and self-evaluate his or her own teaching acts.

International Yearbook of History Education A. Dickinson, P. Gordon, P. Lee, J. Slater, 2013-11-19 This international academic and professional yearbook contains articles and reviews on matters of interest to all concerned with history in education from contributors throughout the world. The yearbook will encourage rigorous exploration or philosophical, psychological, sociological and historical perspectives upon history in education and their relation to practice where appropriate. The theme of the first edition is centralisation and decentralisation of national curricula.

Plurilingualism María Pilar Díez Martínez, Rebecca Place, 2012-12-31 The 2012 TESOL-SPAIN Convention held at the University of Deusto produced a number of relevant papers and presentations compiled in this book. The different papers deal with issues of concern for those teaching both English and in English, and show the progress made in this field to date. The authors are both national and international and their works tackle aspects such as motivation, new methodologies, new testing procedures and so forth.

The Education System in Mexico David Scott, C.M. Posner, Chris Martin, Elsa Guzman, 2018-03-15 Over the last three decades, a significant amount of research has sought to relate educational institutions, policies, practices and reforms to social structures and agencies. A number of models have been developed that have become the basis for attempting to understand the complex relation between education and society. At the same time, national and international bodies tasked with improving educational performances seem to be writing in a void, in that there is no rigorous theory guiding their work, and their documents exhibit few references to groups, institutions and forces that can impede or promote their programmes and projects. As a result, the recommendations these bodies provide to their clients display little to no comprehension of how and under what conditions the recommendations can be put into effect. The Education System in Mexico directly addresses this problem. By combining abstract insights with the practicalities of educational reforms, policies, practices and their social antecedents, it offers a long overdue reflection of the history, effects and significance of the Mexican educational system, as well as presenting a more cogent understanding of the relationship between educational institutions and social forces in Mexico and around the world.

Teaching Statistics in School Mathematics-Challenges for Teaching and Teacher Education Carmen Batanero, Gail Burrill, Chris Reading, 2011-07-31 Teaching Statistics in School Mathematics-Challenges for Teaching and Teacher Education

results from the Joint ICMI/IASE Study Teaching Statistics in School Mathematics: Challenges for Teaching and Teacher Education. Oriented to analyse the teaching of statistics in school and to recommend improvements in the training of mathematics teachers to encourage success in preparing statistically literate students, the volume provides a picture of the current situation in both the teaching of school statistics and the pre-service education of mathematics teachers. A primary goal of Teaching Statistics in School Mathematics-Challenges for Teaching and Teacher Education is to describe the essential elements of statistics, teacher's professional knowledge and their learning experiences. Moreover, a research agenda that invites new research, while building from current knowledge, is developed. Recommendations about strategies and materials, available to train prospective teachers in university and in-service teachers who have not been adequately prepared, are also accessible to the reader.

Global Perspectives on Teacher Motivation Helen M. G. Watt,Paul W. Richardson,Kari Smith,2017-09-08 Many studies of teacher motivation have been conducted in different contexts over time. However, until fairly recently there has not been a reliable measure available to allow comparisons across samples and settings. This has resulted in an abundance of findings which cannot be directly compared or synthesised. The FIT-Choice instrument offers the opportunity to examine motivations across settings. The various studies in this book suggest that people who choose teaching as a career are motivated by a complex interaction of factors embedded within communities and cultural expectations, but seem generally to embrace a desire to undertake meaningful work that makes for a better society. Unlike some careers, where rewards are in the form of salary and status, by and large these factors are not strong drivers for people who want to become teachers. They want to work with children and adolescents, and believe they have the ability to teach.

When Dimple Met Rishi Sandhya Menon,2021-02-09 The inspiration for the Netflix original series Mismatched! A Time Best YA Book of All Time (2021) Everyone is talking about this New York Times bestselling rom-com that Mindy Kaling called “utterly charming!” Eleanor & Park meets Bollywood in this hilarious and heartfelt novel about two Indian-American teens whose parents conspire to arrange their marriage. Dimple Shah has it all figured out. With graduation behind her, she’s more than ready for a break from her family, from Mamma’s inexplicable obsession with her finding the “Ideal Indian Husband.” Ugh. Dimple knows they must respect her principles on some level, though. If they truly believed she needed a husband right now, they wouldn’t have paid for her to attend a summer program for aspiring web developers...right? Rishi Patel is a hopeless romantic. So when his parents tell him that his future wife will be attending the same summer program as him—wherein he’ll have to woo her—he’s totally on board. Because as silly as it sounds to most people in his life, Rishi wants to be arranged, believes in the power of tradition, stability, and being a part of something much bigger than himself. The

Shahs and Patels didn't mean to start turning the wheels on this "suggested arrangement" so early in their children's lives, but when they noticed them both gravitate toward the same summer program, they figured, Why not? Dimple and Rishi may think they have each other figured out. But when opposites clash, love works hard to prove itself in the most unexpected ways.
