eAccess to Justice Karim Benyekhlef, Jane Bailey, Jacquelyn Burkell, Fabien Gélinas, 2016-09-22 Part I of this work focuses on the ways in which digitization projects can affect fundamental justice principles. It examines claims that technology will improve justice system efficiency and offers a model for evaluating e-justice systems that incorporates a broader range of justice system values. The emphasis is on the complicated relationship between privacy and transparency in making court records and decisions available online. Part II examines the implementation of technologies in the justice system and the challenges it comes with, focusing on four different technologies: online court information systems, e-filing, videoconferencing, and tablets for presentation and review of evidence by jurors. The authors share a measuring enthusiasm for technological advances in the courts, emphasizing that these technologies should be implemented with care to ensure the best possible outcome for access to a fair and effective justice system. Finally, Part III adopts the standpoints of sociology, political theory and legal theory to explore the complex web of values, norms, and practices that support our systems of justice, the reasons for their well-established resistance to change, and the avenues and prospects of eAccess. The chapters in this section provide a unique and valuable framework for thinking with the required sophistication about legal change. Published in English.

Total Participation Techniques Pérsida Himmele, William Himmele, 2011-07-21 Providing easy-to-use alternatives to the “stand and deliver” approach to teaching that causes so many students to tune out--or even drop out--Total Participation Techniques presents dozens of ways to engage K-12 students in active learning and allow them to demonstrate the depth of their knowledge and understanding. The authors, Pérsida Himmele and William Himmele, explain both the why and the how of Total Participation Techniques (TPTs) as they explore the high cost of student disengagement, place TPTs in the context of higher-order thinking and formative assessments, and demonstrate how to create a “TPT-conducive classroom.” Readers will learn how to implement field-tested techniques they can use on the spot (e.g., Quick-Draws, Quick-Writes, Chalkboard Splash); with Hold-Up cards (e.g., True/Not True, Selected Response); with movement (e.g., Bounce Cards, Line-Ups, Simulations); and to guide note-taking and concept analysis (e.g., Picture Notes, 3-Sentence Wrap-Up, Debate Team

Carousel). Each TPT is presented in four parts: * A descriptive overview * How It Works--step-by-step instructions for implementation * How to Ensure Higher-Order Thinking--ideas for advancing students beyond surface-level thinking * Pause to Apply--suggestions for how to adapt and personalize the technique for specific contexts and content areas Filled with examples from real classrooms, Total Participation Techniques is an essential toolkit for teachers at all levels and for administrators who want a model for analyzing lessons to ensure that they are relevant, engaging, and cognitively challenging.

Know Your Rights U.S. Attorney's Office,2014-05-27 For more than 200 years, the Constitution of the United States has been a “working” document, maintaining the original principles upon which our nation was founded while, at the same time, changing with the country, as reflected in its amendments. While the U.S. Constitution itself outlines the basic structure of the federal government, its twenty-seven amendments address many subjects but primarily focus on the rights of individual American citizens. This booklet outlines those rights, offering historical context and other information that is both interesting and informative. The continued vitality of our democracy is dependent upon an informed citizenry. Understanding the history of the Constitution and its amendments will assist all of us in more fully appreciating these rights and responsibilities as they have evolved over time. Moreover, such understanding will ensure that these rights will continue to be exercised, valued, and cherished by future generations.

The Character of Curriculum Studies W. Pinar,2011-12-19 Assembles essays addressing the recurring question of the 'subject,' understood both as human person and school subject, thereby elaborating the subjective and disciplinary character of curriculum studies.

We the Kids David Catrow,2009-06-23 Presents an illustrated version of the preamble to the Constitution of the United States.

Positive Psychology in the Elementary School Classroom Patty O'Grady,2013-03-11 Use the neuroscience of emotional learning to transform your teaching. How can the latest breakthroughs in the neuroscience of emotional learning transform the classroom? How can teachers use the principles and practices of positive psychology to ensure optimal 21st-century learning experiences for all children? Patty O'Grady answers those questions. Positive Psychology in the Elementary School Classroom presents the basics of positive psychology to educators and provides interactive resources to enrich teachers' proficiency when using positive psychology in the classroom. O'Grady underlines the importance of teaching the whole child: encouraging social awareness and positive relationships, fostering self-motivation, and emphasizing social and emotional learning. Through the use of positive psychology in the classroom, children can learn to be more emotionally aware of their own and others' feelings, use their strengths to engage academically and socially, pursue meaningful lives, and accomplish their personal goals. The book begins with Martin Seligman's positive psychology principles, and continues into an overview

of affective learning, including its philosophical and psychological roots, from finding the “golden mean” of emotional regulation to finding a child’s potencies and “golden self.” O’Grady connects the core concepts of educational neuroscience to the principles of positive psychology, explaining how feelings permeate the brain, affecting children’s thoughts and actions; how insular neurons make us feel empathy and help us learn by observation; and how the frontal cortex is the hall monitor of the brain. The book is full of practical examples and interactive resources that invite every educator to create a positive psychology classroom, where children can flourish and reach their full potential.

Civic Media Literacies Paul Mihailidis, 2018-08-13 Civic life today is mediated. Communities small and large are now using connective platforms to share information, engage in local issues, facilitate vibrant debate, and advocate for social causes. In this timely book, Paul Mihailidis explores the texture of daily engagement in civic life, and the resources—human, technological, and practical—that citizens employ when engaging in civic actions for positive social impact. In addition to examining the daily civic actions that are embedded in media and digital literacies and human connectedness, Mihailidis outlines a model for empowering young citizens to use media to meaningfully engage in daily life.

Civic Media Eric Gordon, Paul Mihailidis, 2022-06-07 Examinations of civic engagement in digital culture—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life. Countless people around the world harness the affordances of digital media to enable democratic participation, coordinate disaster relief, campaign for policy change, and strengthen local advocacy groups. The world watched as activists used social media to organize protests during the Arab Spring, Occupy Wall Street, and Hong Kong’s Umbrella Revolution. Many governmental and community organizations changed their mission and function as they adopted new digital tools and practices. This book examines the use of “civic media”—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life. Scholars from a range of disciplines and practitioners from a variety of organizations offer analyses and case studies that explore the theory and practice of civic media. The contributors set out the conceptual context for the intersection of civic and media; examine the pressure to innovate and the sustainability of innovation; explore play as a template for resistance; look at civic education; discuss media-enabled activism in communities; and consider methods and funding for civic media research. The case studies that round out each section range from a “debt resistance” movement to government service delivery ratings to the “It Gets Better” campaign aimed at combating suicide among lesbian, gay, bisexual, transgender, and queer youth. The book offers a valuable interdisciplinary dialogue on the challenges and opportunities of the increasingly influential space of civic media.

Rethinking Social Studies Teacher Education in the Twenty-First Century Alicia R. Crowe, Alexander Cuenca, 2015-11-26 In this volume teacher educators explicitly and implicitly share their visions for the purposes, experiences, and commitments necessary for social studies teacher preparation in the twenty-first century. It is divided into six sections where authors

reconsider: 1) purposes, 2) course curricula, 3) collaboration with on-campus partners, 4) field experiences, 5) community connections, and 6) research and the political nature of social studies teacher education. The chapters within each section provide critical insights for social studies researchers, teacher educators, and teacher education programs. Whether readers begin to question what are we teaching social studies teachers for, who should we collaborate with to advance teacher learning, or how should we engage in the politics of teacher education, this volume leads us to consider what ideas, structures, and connections are most worthwhile for social studies teacher education in the twenty-first century to pursue.

Battle Lines Jonathan Fetter-Vorm, Ari Kelman, 2022-01-25 Featuring breathtaking panoramas and revelatory, unforgettable images, *Battle Lines* is an utterly original graphic history of the Civil War. A collaboration between the award-winning historian Ari Kelman and the acclaimed graphic novelist Jonathan Fetter-Vorm, *Battle Lines* showcases various objects from the conflict (a tattered American flag from Fort Sumter, a pair of opera glasses, a bullet, an inkwell, and more), along with a cast of soldiers, farmers, slaves, and well-known figures, to trace an ambitious narrative that extends from the early rumblings of secession to the dark years of Reconstruction. Employing a bold graphic form to illuminate the complex history of this period, Kelman and Fetter-Vorm take the reader from the barren farms of the home front all the way to the front lines of an infantry charge. A daring presentation of the war that nearly tore America apart, *Battle Lines* is a monumental achievement.

Uncle Tom's Cabin Harriet Beecher Stowe, 2015-03-20 The Little Story that Started the Civil War “Any mind that is capable of a real sorrow is capable of good.” — Harriet Beecher Stowe, *Uncle Tom's Cabin* *Uncle Tom's Cabin; or Life Among the Lowly*, is one of the most famous anti-slavery works of all time. Harriet Beecher Stowe's novel helped lay the foundation for the Civil War and was the best selling novel of the 19th century. While in recent years, the book's role in creating and reinforcing a number of stereotypes about African Americans, this novel's historical and literary impact should not be overlooked. This Xist Classics edition has been professionally formatted for e-readers with a linked table of contents. This eBook also contains a bonus book club leadership guide and discussion questions. The Social Studies in Secondary Education Murry R. Nelson, 1994 This document contains a reprint of the 1916 *The Social Studies in Secondary Education: A Six-Year Program Adapted Both to the 6-3-3 and the 8-4 Plans of Organization and Report of the Committee on Social Studies of the Commission on the Reorganization of Secondary Education of the National Education Association* widely believed to be the most important document in the history of citizenship education in the

United States. It legitimated the term social studies to designate formal citizenship education and placed squarely in the field all of those subjects that were believed to contribute to that end. While recognizing the importance of history and the social sciences as contributing to citizenship education, the Committee's report recognized that citizenship education is something more than mastery of separate disciplines. It recognized the study of social problems as a necessary part of the education of citizens, and outlined a content for the social studies that was widely adopted and has remained remarkably unchanged to the present. This book includes annotations by Murry R. Nelson, the editor of the present document, on the 1916 report. Commentaries include: (1) The Social Contexts of the Committee on Social Studies Report of 1916 (Murry M. Nelson); and (2) Thomas Jesse Jones--Doing God's Work and the 1916 Report (Stephen T. Correia). The book also contains a 35-page select annotated bibliography from the ERIC database on social studies reform. The table of contents of the 1915 report on The Teaching of Community Civics is included in an appendix. (Author/DK)

Teaching Civic Engagement Across the Disciplines Elizabeth C. Matto, Alison Rios Millett McCartney, Elizabeth A. Bennion, 2017-09 For democracy to function effectively, citizens must engage together and compromise. Although these skills are critical for a vibrant society, civic engagement education is lacking in America today. This book evaluates the goals, challenges, and rewards of integrating civic education into K-12 and higher education, highlighting best practices.

Animals in Four Worlds Stella Snead, Wendy Doniger, George Michell, 1989-09-07 Animals play a special role in Indian culture. In opposition to deities, they help to frame the human community. Indian philosophy assumes the basic unity of animals and humans and in everyday life animals symbolize various ideas and sentiments. In the realm of Indian art, animals appear everywhere. In this splendid and unique collection of photographs, Stella Snead captures the extraordinary vitality, intelligence, and variety of animals in Indian sculpture found at sites from prehistory through the eighteenth century. Here are cats, peacocks, mongooses, anteaters, cows, hyenas, and tigers, as well as such fantastic creatures as double-bodied lions and elephants with fish tails. Collected from all areas of India, these photographs include images from famous Indian monuments, and museum collections, as well as images from remote sites, some of which have never before been published. Wendy Doniger's essay explores and explains the four worlds or dimensions that animals occupy in Indian thought: nature, the human world, the divine world, and the world of fantasy. George Michell places Indian sculptures of animals in their architectural and art historical context. His chronological survey identifies the location and the subject of the animals photographed and describes the artistic activity of the regions and period from which the photographs are drawn. This beautifully illustrated book will appeal to a wide audience: to those interested in Asian studies, art, architecture, and animals, and to those drawn to Snead's powerful photographs, which capture both the idiosyncratic genius of tiny details and the grand sweep of cosmic symbols.

Teaching Civic Engagement Alison Rios Millett McCartney, Elizabeth A. Bennion, Dick W. Simpson, 2013 Teaching Civic

Engagement provides an exploration of key theoretical discussions, innovative ideas, and best practices in educating citizens in the 21st century. The book addresses theoretical debates over the place of civic engagement education in Political Science. It offers pedagogical examples in several sub-fields, including evidence of their effectiveness and models of appropriate assessment. Written by political scientists from a range of institutions and subfields, Teaching Civic Engagement makes the case that civic and political engagement should be a central part of our mission as a discipline.
