Mixing and Mastering in the Box Steve Savage, 2014 Mixing and mastering are the final challenges in creating great recordings. Great mixes require both creativity and a practical understanding of process, while final masters require both a clear sense for purpose and specialized ears for achieving artistic goals. Mixing and Mastering in the Box gives readers the practical tools for accomplishing both of these tasks while highlighting the artistry of the creative process. While much of the information presented in Mixing and Mastering in the Box is applicable to those using analog mixing gear, or a hybrid of digital and analog tools, the book focuses directly on working completely within the Digital Audio Workstation (DAW). Author Steve Savage lets readers in on such topics as the secrets of collaboration and using EQ, compression, delay, reverb, and brickwall limiting to improve the sound of records, each topic illustrated with a myriad of concrete examples. Mixing and Mastering in the Box is the ultimate reference manual for the home recordist and the perfect basic to intermediate text for any DAW (Digital Audio Workstation) training class in mixing or mastering. The book is also ideal for readers who handle their own mixing and mastering or who wish - or are professionally required - to be better informed when collaborating on mixes and masters.

Here, There and Everywhere Geoff Emerick, Howard Massey, 2006-03-16 An all-access, firsthand account of the life and music of one of history's most beloved bands--from an original mastering engineer at Abbey Road Geoff Emerick became an assistant engineer at the legendary Abbey Road Studios in 1962 at age fifteen, and was present as a new band called the Beatles recorded their first songs. He later worked with the Beatles as they recorded their singles "She Loves You" and "I

Want to Hold Your Hand,” the songs that would propel them to international superstardom. In 1964 he would witness the transformation of this young and playful group from Liverpool into professional, polished musicians as they put to tape classic songs such as “Eight Days A Week” and “I Feel Fine.” Then, in 1966, at age nineteen, Geoff Emerick became the Beatles’ chief engineer, the man responsible for their distinctive sound as they recorded the classic album Revolver, in which they pioneered innovative recording techniques that changed the course of rock history. Emerick would also engineer the monumental Sgt. Pepper and Abbey Road albums, considered by many the greatest rock recordings of all time. In Here, There and Everywhere he reveals the creative process of the band in the studio, and describes how he achieved the sounds on their most famous songs. Emerick also brings to light the personal dynamics of the band, from the relentless (and increasingly mean-spirited) competition between Lennon and McCartney to the infighting and frustration that eventually brought a bitter end to the greatest rock band the world has ever known.
